THE FORNELLS PVC RUNNING RAIL

Security for horses, jockeys and public

Fornells' PVC rails are sturdy, adjustable and easy to install. They are made of high-quality raw materials and are manufactured in our factory, based in Seine-et-Marne, France. Impact resistant, they mark out the boundary of a racetrack or training track and act as the guide-line for horses and jockeys. They can be adapted to suit your specific needs.

STANDARD SAFETY RAIL

SAFETY TEST

REINFORCED SAFETY RAIL

Ideal for **high-safety areas**, such as on the inner racetrack boundaries, home-straight, final bends, narrow tracks and wherever the public is in contact with the horses.

Also available for training tracks and for the inside rail of race tracks. Both economical and easy to install.

PRESTIGE CROWD BARRIER

PRESTIGE CROWD BARRIER

CROWD BARRIER WITH CLOSE-MESH PANELS

The crowd barrier is the most robust model of Fornells' fencing. Its rigid rib-formed panels are designed to ensure the security of the general public when in the close proximity of highly-strung horses in the parade ring and its accesses for example, or along the rails in front of the stands. They can be adapted to suit your specific needs.

FORNELLS PVC Paddock Fencing

Our paddock fencing clearly marks out and renders safe your enclosed areas.

Available in several versions, it is the ideal fencing to equip your training centers, show or jumping arenas, event areas or simply to embellish existing racecourse heritage.

JUMPS FOR RACING AND SCHOOLING WITH THEIR SAFETY WINGS.

Our latest generation of jumps and hurdles is equipped with shock absorbing foam, ensuring optimal safety. Our range features impact bars, as well as synthetic take off bars and birch strands, produced in our factory.

RACING AND SCHOOLING SWIVEL HURDLE

Fornells' swivel hurdle, made out of galvanized steel and featuring a self-supporting pivot, is easily handled by two members of staff. It is fixed to the ground over the entire length of the obstacle, thanks to its retractable take off bar system.
